

## **LAMb 2011-Supplemental Instructions**

Additional Program Instructions for Rodent Ventilated Caging Requests:

1. In addition to the standard LAMb application, the following materials will be required for ventilated caging requests:
  - a. The VMU annual report for FY2010, listing the average daily cage census for colony rodents.
  - b. An additional commitment letter from the facility engineering service (138) attesting that all racks will be installed to ventilate to the HVAC system, and how the pressure system will be set (positive or negative).
2. Site visits by the CVMO or other ORD personnel may be utilized to verify installation of racks.
3. IVC racks purchased under this initiative are subject to potential REQUIP to other stations if installation fails to occur or if future significant drops in census occur.
